Fund Strategy

- Investment predominantly in highly liquid money market instruments, government securities and corporate debt
- The fund typically has a relatively higher portfolio average maturity as compared to liquid/cash fund
- The scheme continues to focus on high credit quality securities (100% AAA portfolio) and a liquid portfolio
- System liquidity has moderated significantly and overnight rates are now around 6.00%-6.25%
- Overall, we remain neutral on duration across HSBC Ultra-Short as markets re-price yield curve given RBI's rate hiking cycle.
- The focus continues to be on the accrual returns in the portfolio.

Why HSBC Ultra Short Duration Fund?

- The Fund would largely maintain high credit quality portfolio of securities with investment predominantly in securities that have high short term credit quality rating
- The security selection would be driven by investment team's view on credit spreads, liquidity and the risk reward assessment of each security
- The scheme would largely maintain high credit quality portfolio basis in-depth credit evaluation which includes financial position of the issuer, external credit ratings opinions, operational metrics, past track record as well as future prospects of the issuer
