2. Expected Benefits of the Proposed Transaction

Broadly, the Proposed Transaction is expected to result in the following benefits:

- L&T Mutual Fund is an established mutual fund in India with an AUM of approximately INR 72,322.38 crores for the month ended September 30, 2022. The Seller established its presence in the mutual funds industry through the acquisition of the mutual fund business of DBS Chola Mutual Fund in 2010 and Fidelity Mutual Fund in 2012. The Seller has demonstrated its ability to successfully integrate and grow acquired mutual fund portfolios. Since its acquisition of the mutual fund businesses of DBS Chola Mutual Fund and Fidelity Mutual Fund, the average AUM of L&T Mutual Fund has increased from approximately INR 2,520 crores (for the month of January 2010 for the erstwhile DBS Chola Mutual Fund) to approximately INR 72,322.38 crores for the month ended September 30, 2022. (Source: AMFI).
- The Proposed Transaction will help HSBC to increase foothold in the mutual fund industry in the near future and HSBC is committed to growth. The proposed sale of L&T Mutual Fund to HSBC Mutual Fund will increase the scale and resources of the entity and deliver a strong value proposition to all unitholders. The strength of the HSBC global brand and its strong track record in the area of investor care is expected to help enhance the investor experience of all unit holders.
- HSBC AMC has a long track record and has delivered reasonable return to its unitholders.
- The merger of HSBC MF Schemes and L&T MF Schemes would allow HSBC AMC and HSBC Trustees to avoid the existence of similar schemes in HSBC Mutual Fund and enable optimum utilization of resources and to present to the unitholders, a simplified range of schemes in the interest of the unitholders. It is in the interest of the unitholders that the HSBC Trustees and the board of directors of HSBC AMC have decided to merge some of their schemes with those of the schemes of L&T AMC or vice versa.

9. Tax Implications of Merger of the Schemes

There should not be any income-tax implications due to the Merger of the Schemes (as described in paragraph 5 of this letter) in the hands of unitholders since merger/consolidation of mutual fund schemes is considered as a tax neutral event. Transfer of units upon consolidation of mutual fund schemes of two or more schemes of equity-oriented fund or two or more schemes of a mutual fund other than equity oriented fund in accordance with the MF Regulations is exempt from capital gains i.e., any transfer of units of consolidating scheme of a mutual fund, made in consideration of the allotment of the units of the consolidated scheme by the unitholder is not considered as "transfer" by virtue of the provisions of Section 47(xviii) of the Income-tax Act, 1961 (the "IT Act") and hence the gains on such transfer should not be chargeable to tax.

For any redemption/switch transactions post the Merger of the Schemes (as described in paragraph 5 of this letter), the following points are relevant for taxation (held as capital asset):

- For the purpose of classifying the units of consolidated scheme into long term or short term, the period of holding of units acquired in the consolidation of schemes of mutual fund shall include the period for which units in consolidating schemes were held by the unitholder in terms of the provisions of Section 2(42A) of the IT Act.
- Further, Section 49(2AD) of the IT Act provides that the cost of acquisition of the units acquired in the consolidated scheme of mutual fund (in consideration of allotment of units of consolidating scheme) shall be deemed to be the cost of acquisition of the units in the consolidating scheme of mutual fund.

However, redemption and/or switch of units from the HSBC Short Duration Fund during the Exit Option Period shall be considered as redemption and will result in short term/long term capital gain/loss in the hands of the unitholders depending on the period of holding of the investment.

In case of NRI unitholders, TDS would be deducted in accordance with applicable tax laws for redemption/switch-out of units from the HSBC Short Duration Fund during the Exit Option Period and same would be required to be borne by such unitholder only.

Securities Transaction Tax ("STT") on redemption/switch-out of units, if any, exercised during the Exit Option Period in HSBC Short Duration Fund shall be borne by HSBC AMC.

Stamp duty shall not be levied on the units allotted under the Surviving Scheme, upon the Merger of the Schemes.

STT on extinguishment of units (if applicable) under the HSBC Short Duration Fund and allotment under the Surviving Scheme upon the Merger of the Schemes (as described in paragraph 5 of this letter), would not be levied to the unitholders.

In view of the individual nature of tax consequences, unitholders are advised to consult the professional financial/tax advisors with regard to tax and other financial implications arising out of their participation in Merger of the Schemes.

In pursuing such a policy, it should be recognized that the best overall returns are achieved by anticipating or reacting to interest rate changes rather than aiming for the highest possible interest rates at all times. The best resultant overall return is therefore achieved through both capital appreciation and income, which may result in somewhat lower yields than might otherwise normally appear obtainable from the relevant securities. The Scheme aims to provide investors with actively managed portfolios of interest bearing transferable debt and money market instruments. The portfolios may also include liquid assets and other assets permitted from time to time, with a short remaining maturity, especially in times of rising interest rates. The Scheme exposure to instruments bearing price risk will be controlled, such that the Scheme offers an appropriate mix of liquidity and returns. With the aim of controlling risks, rigorous in depth credit evaluation of the instruments proposed to be invested in will be carried out by the Investment Team of the AMC. The credit evaluation includes a study of the operating environment of the company, the past track record as well as the future prospects of the issuer, the short as well as long-term financial health of the issuer. The AMC will also be guided by the ratings of rating agencies such as CRISIL, CARE and ICRA or any other rating agency as approved by the regulators. In addition, the Investment Team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same. The Fund may invest a part of the portfolio in various debt securities issued by corporates and/or state and central government. Such government securities may include securities which are supported by the ability to borrow from the treasury or supported only by the sovereign guarantee or of the state government or supported by Government of India (GOI)/state government in some other way. Given that the liquidity of fixed income instruments is currently limited, the AMC will try to provide liquidity by staggering maturities for various instruments, as well as holding a sufficient portion of the portfolio in more liquid government and corporate paper as well as money market securities. The Scheme may invest in other Scheme(s) managed by the AMC or in the schemes of any other mutual fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.	The Scheme shall follow an active duration management strategy. The fund manager shall manage the fund based on the outlook on interest rates and liquidity etc. Efficient portfolio construction shall be used to manage interest rate risk and credit risk across different asset class and duration buckets, and optimize risk-adjusted returns. Risk Factors:

Risk associated with short selling and securities lending by scheme

Short Selling Risk: The risk associated with upward movement in market price of security sold short may result in loss. The losses on short position may be unlimited as there is no upper limit on rise in price of a security.

Securities Lending: The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e., the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk factors related to investments in Structured Obligations (SO)/Credit Enhancements (CE):

Structured Obligations ("SO") are complex financial instruments issued by entities intending to improve their financing profile with the help of non-conventional financial instruments.

Credit Enhancement ("CE") rating is assigned by Credit Rating agencies to a debt security based on an identifiable credit enhancement for the security which could be in the form of letter of comfort, guarantee, shortfall undertaking etc., from another entity than the issuer, related or not related to the issuer. CE could additionally include pledging of equity shares listed on a stock exchange with a suitable haircut.

Apart from standard risks related to debt instruments, these instruments are further exposed to the below risks:

Liquidity Risk: SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities generally lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is shallow compared to similar rated conventional debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to exit such debt instruments when required and generate liquidity for the scheme or lead to higher impact cost when such instruments are sold impacting portfolio returns.

Credit Risk: Securities which have a structure with a guarantee from the corporate/promoter, may see an adverse effect if there are any signs of stress at the promoter/group level, even though the standalone borrowing entity's debt servicing capability and repayments may not see any material impact, from a future cash flow perspective. CEs are exposed to credit risk pertaining not only to the issuer of the security but also to the entity providing the credit enhancement. The credit risk of debt instruments which are CE rated is based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. Therefore, apart from issuer level credit risk, such debt instruments are also susceptible to structure related credit risk.

Risk factors associated with investments in Perpetual Debt Instruments (PDI) including Additional Tier-1 and Tier-2 bonds

The scheme may invest in certain debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and/or convertible to equity upon trigger of a pre-specified event for loss absorption including Additional Tier I bonds and Tier 2 bonds issued under Basel III framework (known as perpetual debt instruments). PDIs are instruments issued by the borrower to strengthen their capital structure and as the name suggests these instruments do not have a specific maturity date but have an embedded call option instead and maybe less liquid than conventional debt instruments. These bonds are subordinate to all other debt and only senior to equity capital. The issuer may call or redeem the bonds on the call exercise date if they can refinance the issue at a cheaper rate, especially when interest rates are declining. The issuers of such instruments could be Banks, NBFCs and Corporates. PDIs issued by Banks and NBFCs fall under scope of Reserve Bank of India ("RBI")'s guidelines for Basel III capital regulations. These are also referred to as Additional Tier I (AT1 bonds). However, there are no regulatory guidelines for issuance of PDIs by Corporates.

Since PDIs have special features other than usual non-convertible bonds, there are additional risks associated with such instruments which are listed below –

Risk related to coupon servicing –

Banks - As per the terms of the instruments, Banks may have discretion at all times to cancel distributions / payment of coupons. In the event of non-availability of adequate distributable reserves and surpluses or inadequacy in terms of capital requirements, RBI may not allow banks to make payment of coupons. These bonds may not be permitted to pay these coupons if the Bank's financial position improves subsequently (non-cumulative).

NBFCs - While NBFCs can defer/postpone payment of coupon in case paying the coupon leads to breach of capital ratios, they also have discretion at all times to cancel payment of coupon.

Corporates - Corporates usually have discretion to defer the payment of coupon. However, the coupon is usually cumulative and any deferred coupon shall accrue interest at the original coupon rate of the PDI.

Risk of write down or conversion to equity –

In the event of shortfall in maintenance of capital adequacy ratios and/or Point of Non Viability Trigger (PONV – a point defined by RBI when a bank is deemed to have become non-viable unless appropriate measures are taken to revive its operations or infusion of public sector capital), PDIs issued by Banks could be written down or converted to common equity. This risk does not exist in case of PDIs issued by NBFCs and Corporates.

Risk of call option not exercised by the issuer –

Banks and NBFCs - The issuing Banks and NBFCs have an option to call back the instrument after minimum period as per the regulatory requirement from the date of issuance and specified period thereafter, subject to meeting the RBI guidelines. However, if the issuer does not exercise the call on first call date, the Scheme may have to hold the instruments for a period beyond the first call exercise date and hence may be exposed to valuation impacts.

Corporates – Unlike Banks and NBFCs there is no minimum period for call date for Corporate issuers. However, if the corporate does not exercise

the call option, the Scheme may have to hold the instruments for a period beyond the call exercise date and hence may be exposed to valuation impacts.

Risk Mitigation – The Scheme will not invest more than 10% of the NAV of the scheme in such instruments and will limit exposure to 5% of the NAV of the Scheme for such instruments issued by a single issuer.

Segregated Portfolio

In order to ensure fair treatment to all investors in case of a Credit Event and to deal with liquidity risk, SEBI (vide its circular no. SEBI/HO/IMD/DF2/CIR/P/2018/160 dated December 28, 2018) has allowed creation of Segregated Portfolio of debt and money market instruments by mutual fund schemes.

Benefits associated with Segregated Portfolio

The creation of Segregated Portfolio is aimed at ring fencing a bad asset and restrict cascading effect of illiquidity on the rest of portfolio. This will ensure fair treatment to all investors in case of a Credit Event and allow HSBC AMC to deal with liquidity risk. This offers advantage to the investors in the following ways:

- Protecting interest of the investors – It protects investors from exits of large investors as segregation of bad assets help in stabilizing the NAV and minimize panic redemptions, thereby providing a cushion to the liquid portfolio of the Scheme.
- Fair treatment to the investors – New investors coming to the Scheme (Main Portfolio) after the Credit Event will neither get benefit of subsequent recovery, if any, of the bad assets nor will they have to bear the cost of further reduction in value of bad assets. Furthermore, an existing investor exiting from the liquid portfolio (Main Portfolio) after the Credit Event shall still be entitled to receive his portion of subsequent recovery of bad assets in the Segregated Portfolio.

The salient features of creation of Segregated Portfolio is given as below:

Creation of Segregated Portfolio

Creation of Segregated Portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated Portfolio may be created, in case of a Credit Event at issuer level i.e., downgrade in credit rating by a SEBI registered Credit Rating Agency ("CRA"), as under:
 - a. Downgrade of a debt or money market instrument to 'below investment grade', or
 - b. Subsequent downgrades of the said instruments from 'below investment grade', or
 - c. Similar such downgrades of a loan rating, or
 - d. Trigger of a pre-specified event for loss absorption in case of debt instruments with special features such as subordination to equity (absorption of losses before equity capital) and/or conversion to equity.
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of Segregated Portfolio shall be based on issuer level Credit Events as mentioned above and implemented at the ISIN level.
- 3) In case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments, actual default of either the interest or principal amount by the issuer of such instruments shall be considered as a Credit Event for creation of Segregated Portfolio.
- 4) In case of debt instruments with special features mentioned above, if the instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the Trigger Date. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the Trigger Date.
- 5) Creation of Segregated Portfolio is optional and is at the discretion of the AMC.

Definitions

- 1) The term 'Segregated Portfolio' means a portfolio, comprising of debt or money market instrument affected by a Credit Event that has been segregated in a mutual fund scheme.
- 2) The term 'Main Portfolio' means the scheme portfolio excluding the Segregated Portfolio.
- 3) The term 'Total Portfolio' means the scheme portfolio including the securities affected by the Credit Event.

Process for Creation of Segregated Portfolio

- 1) On the date of Credit Event, the AMC shall decide on creation of Segregated Portfolio. Once the AMC decides to create Segregated Portfolio, it shall:

- a. seek approval of Board of Trustees prior to creation of the Segregated Portfolio;
 - b. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The Fund will also disclose that the segregation shall be subject to the Trustees approval. Additionally, the said press release will be prominently disclosed on the website of the AMC; and
 - c. ensure that till the time the Trustees approval is received, which in no case shall exceed 1 business day from the day of Credit Event, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once the Trustees approval is received by the AMC:
 - a. Segregated Portfolio will be effective from the day of Credit Event.
 - b. The AMC shall issue a press release immediately with all relevant information pertaining to the Segregated Portfolio. The said information will also be submitted to SEBI.
 - c. An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d. The Net Asset Value ("NAV") of both Segregated and Main Portfolios will be disclosed from the day of the Credit Event.
 - e. All existing investors in the scheme as on the day of the Credit Event will be allotted equal number of units in the Segregated Portfolio as held in the Main Portfolio.
 - f. No redemption and subscription will be allowed in the Segregated Portfolio. However, upon recovery of any money from Segregated Portfolio, it will be immediately distributed to the investors in proportion to their holding in the Segregated Portfolio.
 - g. The AMC shall enable listing of units of Segregated Portfolio on the recognized stock exchange within 10 working days of creation of Segregated Portfolio and also enable transfer of such units on receipt of valid transfer requests.
 - 3) If the Trustees do not approve the proposal to segregate portfolio, the AMC will issue a press release immediately informing investors of the same.

Processing of Subscription and Redemption Proceeds

- 1) All subscription and redemption requests for which NAV of the day of Credit Event or subsequent day is applicable will be processed as under:
 - i. Upon Trustees' approval to create a Segregated Portfolio - Investors redeeming their units will get redemption proceeds based on the NAV of Main Portfolio and will continue to hold the units of Segregated Portfolio. Investors subscribing to the scheme will be allotted units only in the Main Portfolio based on its NAV.
 - ii. In case Trustees do not approve the proposal of Segregated Portfolio, subscription and redemption applications will be processed based on the NAV of Total Portfolio.

Disclosure

The AMC shall make necessary disclosures as mandated by SEBI, in statement of account, monthly/half yearly portfolio statements, KIM, SID, Scheme Advertisements, Scheme Performance data, AMC's website and at other places as may be specified.

The information regarding number of Segregated Portfolio(s) created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

The NAV of the Segregated Portfolio shall be declared on daily basis.

Further, the investors of the Segregated Portfolio shall be duly informed of the recovery proceedings of the investments of the Segregated Portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Total Expense Ratio (TER) for the Segregated Portfolio

- 1) The AMC will not charge investment and advisory fees on the Segregated Portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in Segregated Portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the Main Portfolio (in % terms) during the period for which the Segregated Portfolio was in existence.

- 3) The legal charges related to recovery of the investments of the Segregated Portfolio may be charged to the Segregated Portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the Main Portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to Segregated Portfolio shall in no case be charged to the Main Portfolio.

Monitoring by Trustees

The Trustees will monitor the compliance of the SEBI Circular in respect of creation of Segregated Portfolio and disclosure in this respect shall be made in Half-Yearly Trustee reports filed with SEBI.

In order to avoid mis-use of Segregated Portfolio, Trustees shall have a mechanism in place to negatively impact the performance incentives of fund managers, Chief Investment Officers, etc., involved in the investment

process of securities under the Segregated Portfolio, mirroring the existing mechanism for performance incentives of the AMC, including transfer of such impacted amount to the Segregated Portfolio.

Risks associated with Segregated Portfolio

Liquidity risk – Segregated Portfolio is created to separate debt and money market instruments affected by a Credit Event from the Main Portfolio of the Scheme. The Fund will not permit redemption of the Segregated Portfolio units, but the units will be listed on a recognized stock exchange. The Fund is not assuring any liquidity of such units on the stock exchange. Further, trading price of units on the stock exchange may be significantly lower than the prevailing NAV. Investors can continue to transact (subscribe/redeem) from the Main Portfolio.

Credit risk – While the AMC will put in sincere efforts to recover the securities in the Segregated Portfolio and distribute the same to unit holders, it is likely that such securities may not realise any value leading to losses to investors.
